

## Nasuni Boilerplate

Nasuni is a leading hybrid cloud storage solution that powers business growth with effortless scalability, built-in security, and fast edge performance using a unique cloud-native architecture. The Nasuni File Data Platform delivers operational excellence by consolidating NAS and backup, eliminating data silos, and making management easy and flexible without changes to apps or workflows. Its built-in security offers proactive defense and rapid recovery, lowering organization's risk from the detrimental effects of ransomware attacks and other disasters. Synchronized access to file data everywhere ensures user productivity by supporting remote and hybrid work. By leveraging object storage, data is consolidated and optimized for content intelligence tools and AI workflows.

Organizations worldwide rely on Nasuni, including leaders in manufacturing, construction, energy, consumer goods, and public sectors. Nasuni's corporate headquarters are located in Boston, Massachusetts, USA and the company delivers services to over 70 countries. For more information, visit [www.nasuni.com](http://www.nasuni.com).
